PROFILE

Full-stack software engineer building production web, mobile, backend, AI, and cloud systems. Experienced in taking products from architecture and implementation through integrations, deployment, and operations.

EXPERIENCE

Software Engineer Single Solution · Full-time

Nov 2024 – Present

- Build and maintain full-stack products across fintech, health, marketplaces, AI publishing, and real-time trading.
- Owned backend and deployment for Healthtionary and Open 7; delivered frontend and backend features for Phoenix Trader Funding.
- Built Le Flux end to end and delivered Publish Shark's backend, including AI, payments, data, real-time, and cloud integrations.

SELECTED PROJECTS

Automiq

Electron · Python · FastAPI · Gemini

Built a screenshot-driven Windows automation agent with structured planning, voice commands, environment discovery, safety guards, HUD, history, and templates.

MyFam

Expo · Node.js · MongoDB · Next.js

Built a complete safety check-in product with scheduled escalation, emergency contacts, gamification, mobile app, API, admin, and marketing site.

Le Flux

Fastify · PostgreSQL · OpenRouter · WebSockets

Built a real-time multi-model trading arena with market ingestion, scheduled AI cycles, model seats, leaderboard, cost tracking, and risk monitor.

CORE SKILLS

Frontend

React, Next.js, React Native, Expo, Electron, Tailwind

Backend

Node.js, Express, Laravel, FastAPI, REST, WebSockets

Data

MongoDB, MySQL, PostgreSQL, SQLite

AI & cloud

OpenAI, Gemini, OpenRouter, AWS, Cloudflare, Nginx

EDUCATION

BS Computer Science University of South Asia

2022 – 2026
